What are bioproducts?

Bioproducts...

- are produced from renewable matter, usually from living plants.
- can be transformed into products, packaging, or alternative power.
- must meet approval of the USDA.

The USDA Biopreferred program

- Help address climate change with renewable alternatives to petroleum-based products
- Lower the concentration of greenhouse gasses in the atmosphere
- Create new markets and expand existing ones
- Generally safer for people and the environment than petroleum-based counterparts
- Perform as well as or better than many non-biobased alternatives
- Represent technological advances and innovations.
- Categories include *Fibers and Fabrics, Filters, Clothing, and Perfume*, as well as *Adhesives, Safety Equipment, Engine Crankcase Oil*, and *Textile Processing Materials* (which has grown 84%!)
