Grounded

The Mississippi River level is too low for barges. You must lighten your load by 10% to continue the journey. Lose 10% of your bushels on any barge.

Traffic jam

Your transports are stuck!
Add an additional space cost for each transport on this route.

Mechanical difficulties

Roll the dice to see how many of your transports have broken down, then pay for that many more additional transports.

Global disaster

A large scale disruption of markets has occurred. Reroll the dice to determine the value of the bushels of soybeans.
(This card affects all players.)

Shipping error!

Your truck driver got lost in transit!
If you sent by truck, lose one truckload worth of bushels.

Fuel costs increase

Fuel shortages have caused prices to rise. Pay an additional 10% cost per space remaining on your route.
(This card affects all players.)

Fuel costs decrease

Fuel surpluses have caused prices to fall.
Save 10% cost per space remaining on your route. (This card affects all players.)

Spoiled goods

10% of stored bushels are spoiled.
Subtract them from your total value.
(This card affects all players.)

Everybody needs it

Demand for storage increases future prices. Raise the price of storage by 10% the turn after this card is drawn.
(This card affects all players.)

Active market

Fewer companies are storing soybeans. Lower the price of storage by 10% the turn after this card is drawn.
(This card affects all players.)

Clear skies

Your routes and costs are unaffected.
