

Water Quality

Connect to your life

Research the area near your home. To do so, please enter your home address into

Google Maps (maps.google.com). Then scroll through the map by zooming in, scanning left/right, and zooming out to examine the area near your home. Below, please identify landmarks or buildings that would cause non-point (source not easily identified) and point (source easily identified) pollution.

Address examined:

Sources of non-point pollution:

Sources of point pollution:

What were the biggest concerns in your community for pollution? Why?

Talk to your teacher about testing water quality in your watershed and how to improve/protect them.
