

A photograph of a soybean field at sunset. The sun is low on the horizon, creating a warm, golden glow. The soybean plants are silhouetted against the bright sky, with their characteristic trifoliate leaves and seed pods visible. The overall scene is peaceful and captures the end of a day in a rural agricultural setting.

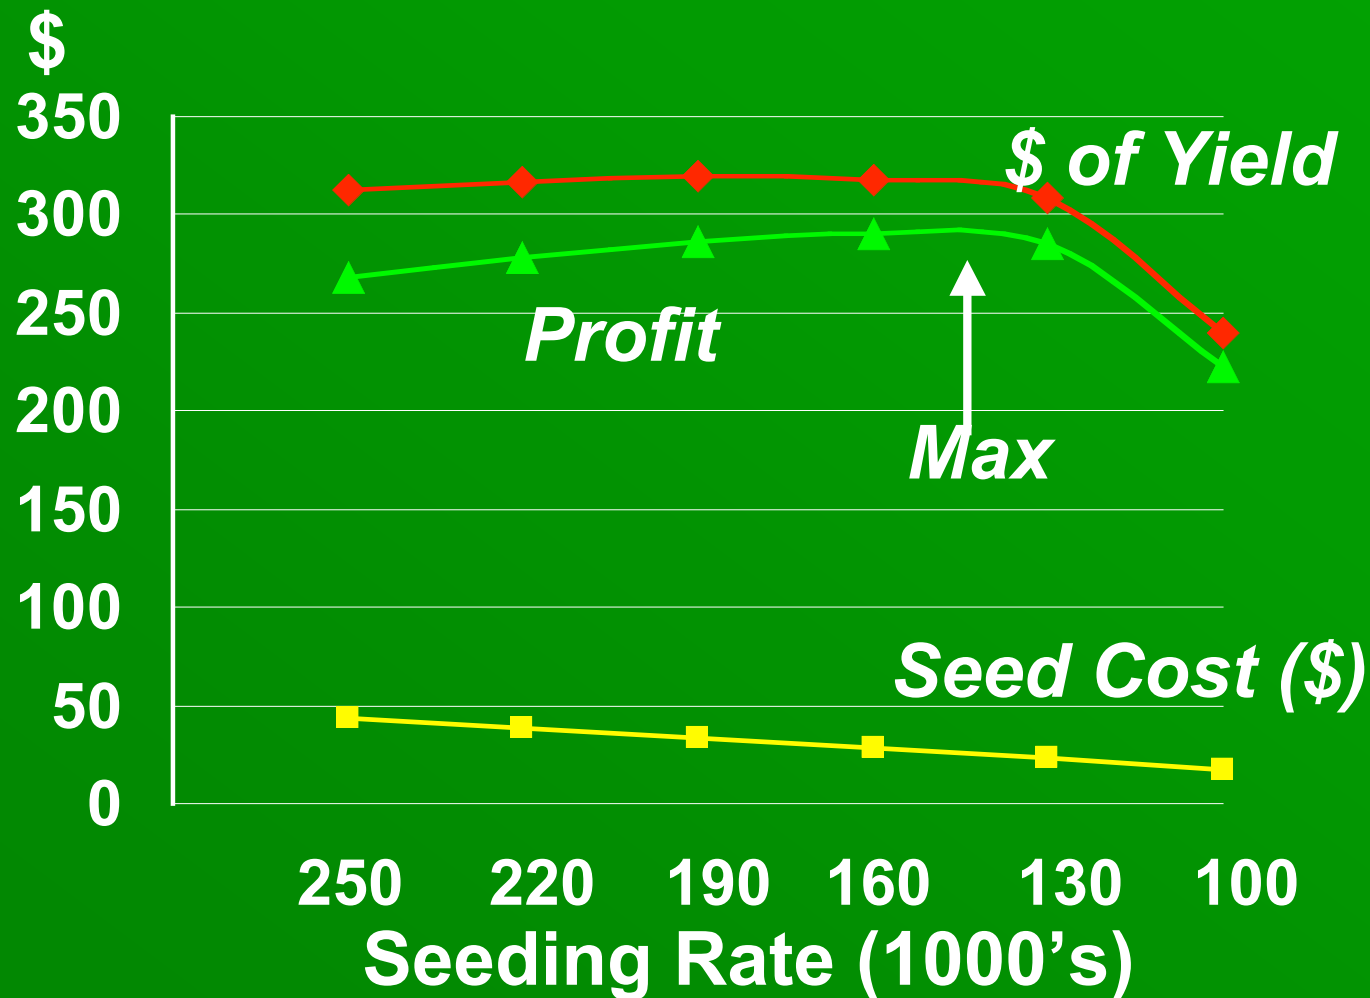

Impacts of Changing Seeding Rates in Soybean

**Shawn P. Conley
Soybean Extension Specialist
Purdue University**

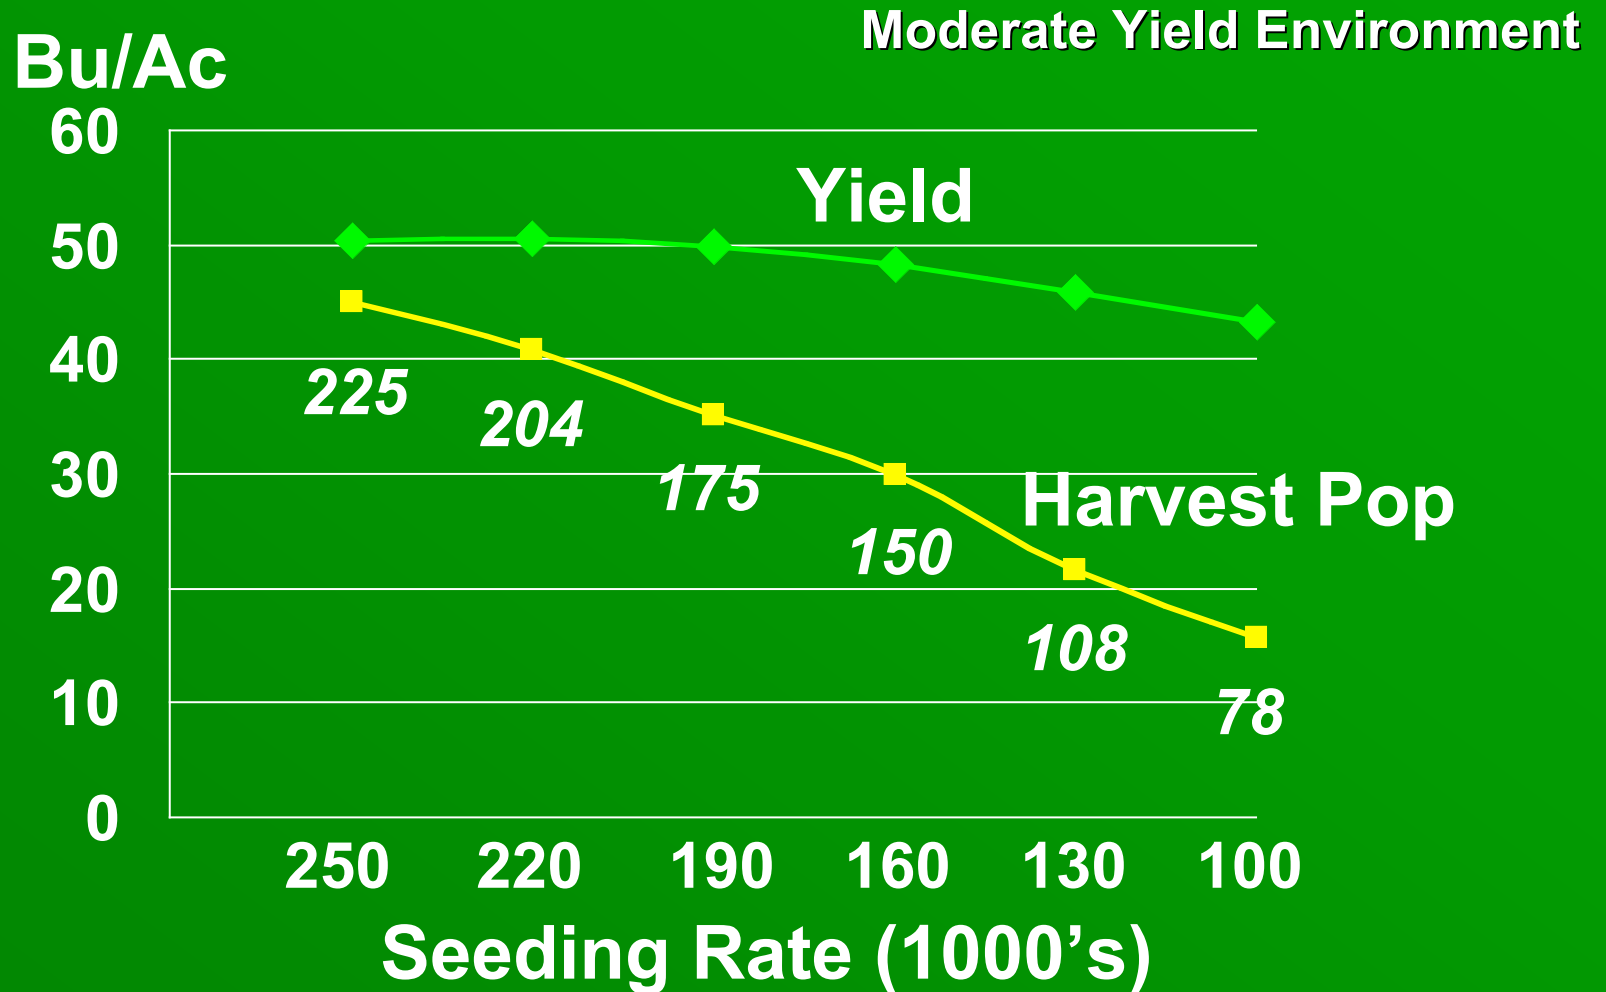

Should Yield Environment Affect Seeding Rate

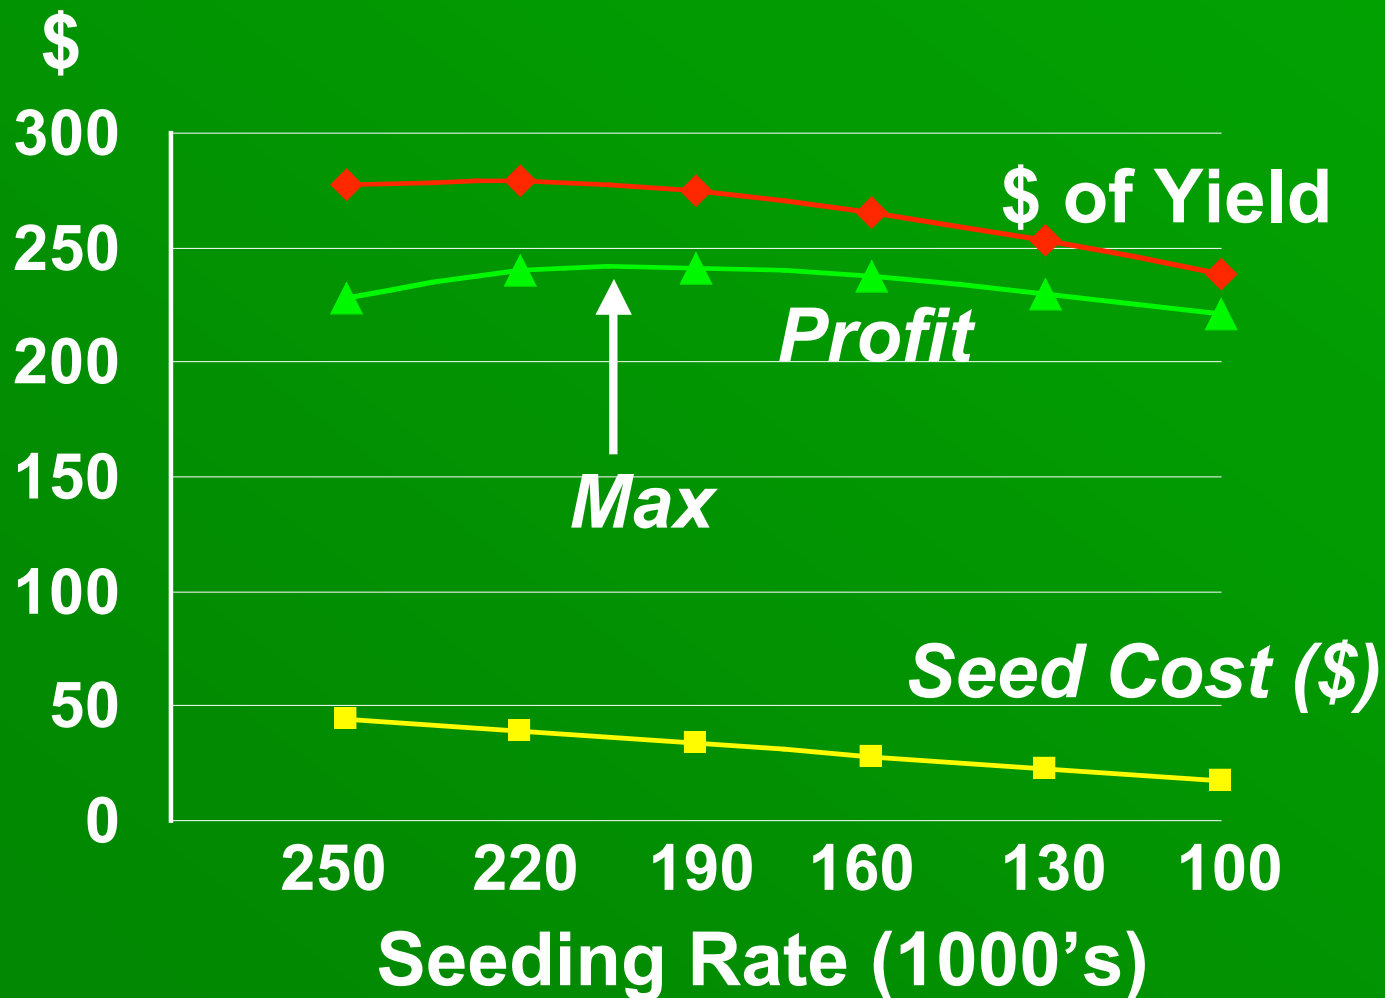

Economic Analysis for a High Yield Field
