

# INCUBATOR GUIDE FOR HATCHING CHICKS

## Incubator recommendations

- Sturdy table close to an electric outlet
- Away from drafts, doors and windows
- Quiet corner to avoid bumps and traffic

## Days 1-18

- Temperature: 99.5° F
- Humidity: 60%
- Eggs in turner

## Days 19-21

- Temperature: 99.5° F
- Humidity: 65%
- Eggs on plastic grid (remove turner from incubator)

## Cleaning incubator

Use hot water only. Place in sunlight to dry.  
Do not use any chemicals; this will decrease hatching rates.
